	Solid State Drive (SSD) highly recommended	SSD is preferred over reliable, durable and consistent due to their better performance. Avoid e-Casting. These are often found in cheap devices and tend to have high failure rates.
--	---	---

RAM (Working memory)	recommended: 8 or greater	Working memory is used by the operating system and applications. When memory is low, the system may become sluggish or crash. Anything less than 4GB is not recommended for modern operating systems. It is recommended to have at least 8GB of RAM for a smooth experience.
-------------------------	------------------------------	--

Processor	recommended: 2.5 GHz or greater	The processor is the brain of the computer. It is responsible for executing instructions. A 1.5 GHz processor is considered slow and frustrating to use. So processors for video production will not perform well with slow processors. On the other hand, high-end processors such as Intel i7 or Core i7 (14 cores) can handle more tasks. When it comes to speed vs longevity of battery life.
-----------	------------------------------------	--

This is the brain of the computer. The reliability of processors. The brands in the Windows environment are Intel Core, AMD Ryzen, and Qualcomm's Snapdragon. Below highlights the different levels based on cost and performance.

Intel & Core Performance

- Intel -- Core i3, Core 3 (Ultra), All N series, Intel Core and Pentium
- AMD -- Athlon, Ryzen 3 (US series)

Processor

Intel Core, AMD Ryzen, Qualcomm

Intel & Core Performance

- Intel -- Core i5, Core i7, Core 5, Core 7 (US series)
- AMD -- Ryzen 5, Ryzen 5 (US series)

Intel and High Performance

- Intel -- Core i5 (X series), Core i7 (Ultra), and AMD Ryzen 7, AMD Ryzen 9

Stylu	Option I	If the device is not available
Protective case	Essential	Various types
Gaming app	Highly discouraged	This is not a device's option. Software is not downloaded so...
Microsoft 5	Purchase not required	The cost is up to you. The software is...
Third Party Virus Software	Consider carefully	Windows. Other malware. To block... diode... sufficient
